

WITH DEXTER O-SERIES YOU HAVE TOTAL CONTROL

ULTIMATE FLEXIBILITY

With the ability to program 100 unique cycles comprised of up to 20 distinct stages with many setting options, our controls offer the flexibility and precision you need to ensure your laundry is handled properly.

MOISTURE DETECTION SYSTEM

Our patented moisture detection system with wireless sensing technology takes the guess-work out of drying. Each auto dry cycle automatically stops when the load is dry, increasing throughput and reducing linen wear.

FIRE RESPONSE SYSTEM

All O-Series dryers offer the added safety of our Fire Response System by automatically sensing when a load is unexpectedly increasing in temperature. Water-based Fire Response models are also available.

MULTI-LINGUAL OPTIONS

Our controls can be set for multiple languages either globally or for specific cycles. This means you could create cycles for your English-speaking employees and your employees that speak other languages, reducing the risk of misunderstanding.

INDUSTRY SETTINGS

Dirty laundry is common, but your specific needs are unique. Our controls offer cycles created specifically for certain industries. Whether you run a hotel, vet clinic, or nursing home, our control has the preset options you need to handle your laundry.

SPECIALTY CYCLES

Our controls can be programmed for special cycles, such as ultra-delicate for wet cleaning. Plus, our 10-port chemical injection system allows for the right combination at the right time.

EASY TO PROGRAM

DexterLive.com makes it easier than ever to program your controls and manage your laundry. This free web application allows you to create and adjust all of your cycle settings. Your settings can then be downloaded and copied to your machines via USB.

MANAGEMENT REPORTING

Keep an eye on the productivity of your laundry room with our Total Control reporting options. Track machine downtime and cycle usage to ensure your laundry is running efficiently.

HEATED WASHERS

For applications where precision is critical, we offer heated washers that give real-time temperature feedback to ensure every load reaches its target temperature.

DEXTER O-SERIES PRODUCTS
