# DexterLive
Parts

DexterLive Location Kit

The **Location kit** (9732-308-002) consists of the paired and preprogrammed DexterLive Gateway and Fortinet router, the power connectors for each of these, the USB device with the unique backup information for your location kit and (1) Cat5e cable. Each Gateway and router have matching serial numbers and the Gateway module has a unique gateway code that allows access to DexterLive. This code cannot be duplicated. This set up system will only work in one location.

NOTE: The Gateway and DexterLive router are a paired set. If the router settings are reset or if the two devices are separated, they will no longer communicate.

NOTE: We strongly recommend connecting the power connections for the Dexter supplied router and DexterLive gateway to a suitable surge protector and battery backup unit for power stability!

9732-308-002

1.)	9150-052-003	FG-40F Fortinet Router w/CAT5E Cable (Serial required to order replacement)	Qty. 1
2.)	9150-049-002	DexterLive Gateway (Serial number required to order replacement)	Qty. 1
