

# REPLACING A BROKEN V BELT ON THE WASHER

**Step 1 – Shut power off to machine.**

**Step 2 – Remove rear panel.**

- Remove (10) 5/16 screws from the rear panel.
- Once screws are removed the panel can now be removed from machine.

**Step 3 – Replace V belt.**

- Remove old or broken V belt from machine.
- Install new V belt by placing on motor pulley and rolling it on to the drive pulley.
- Replace rear panel.
